

# LAYOUT

Title here

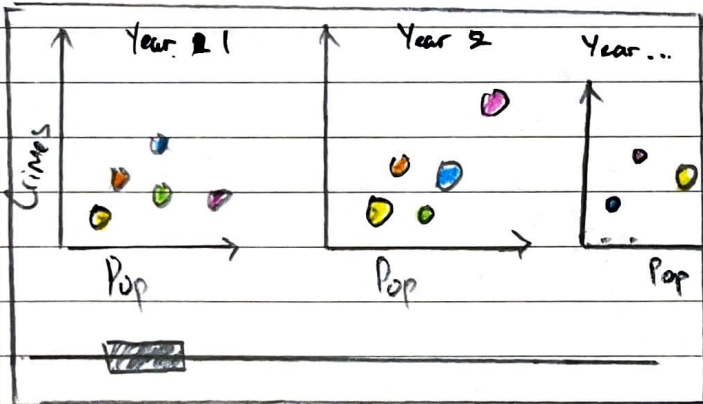

Hook or story to engage the viewers

Section 1: Choropleth map and area chart of...

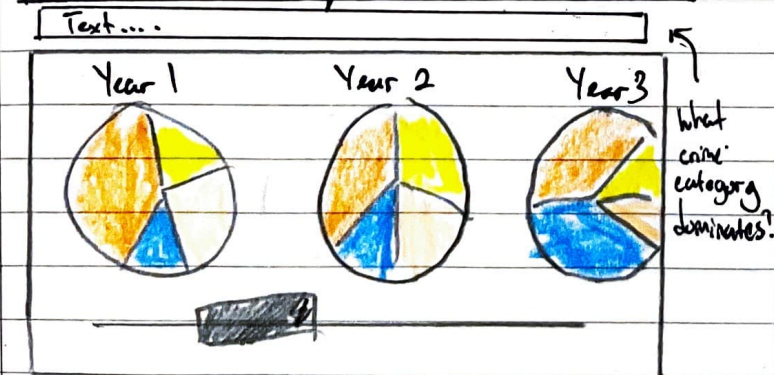

Description about the visualization like which state has the highest crime index

Section 2: Does the population affect crime rate?

Some text providing some insights and contribute to the question in the header

Some description about the crime category and its trend over the year

Title: Malaysia states' crime statistic

Author: Go Wei Zheng

Date: 8/10/2024

Sheet: 4

Task: Initial designs

## Focus

Each section header contains some text with a question/goal of the visualization.

E.g.

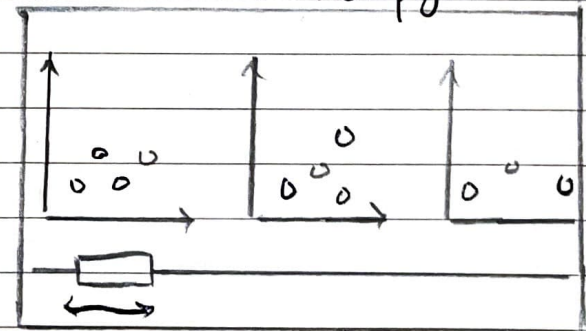

Ka Scatterplot: Is <sup>higher</sup> population leading to <sup>higher</sup> crime rate?

Piechart: What is the crime category mostly comprised of?

A scrollbar is made for visualisations that are too big to fit in one entire page.

## OPERATIONS

Scrollbar for visualisation too large, to fit the width of the page.

## DISCUSSION

### PROS

With the addition of a scrollbar, viewers do not have to scroll the entire page and only the visualization.

### CONS

While this does make it easier to view the visualization, viewers are unable to compare all multiples at once.
